

Case Study - Stansted Airport

Requirements

The customer required suitable lighting that not only could withstand the weather elements and high traffic volumes passing each day but also have the ability to be aesthetically pleasing to look at.

We initially started typing some text here about the project to explain more about it but currently I need to speak to Kevin and Paul about this.

Proposal

The customer required suitable lighting that not only could withstand the weather elements and high traffic volumes passing each day but also have the ability to be aesthetically pleasing to look at.

Solution

The customer required suitable lighting that not only could withstand the weather elements and high traffic volumes passing each day but also have the ability to be aesthetically pleasing to look at.

Benefits

- Improved lighting
- Energy saving
- Less maintenance
- Quick installation
- 5 Years warranty

" A fantastic final result that we are really pleased with. Coco Lighting advised us from the beginning on the benefits of this design and a year on we are really pleased."

John Smith - Operations
